Review

Chlorophyll *a* fluorescence induction
D. Lazár (Czech Republic) 1

Regular papers

Topographical characterization of the ubiquinone reduction site of glucose dehydrogenase in *Escherichia coli* using depth-dependent fluorescent inhibitors
H. Miyoshi, Y. Niitome, K. Matsushita, M. Yamada and H. Iwamura (Japan) 29

Fluorescence properties of chlorophyll *d*-dominating prokaryotic alga, *Acaryochloris marina*: studies using time-resolved fluorescence spectroscopy on intact cells
M. Mimuro, S. Akimoto, I. Yamazaki, H. Miyashita and S. Miyachi (Japan) 37

Cytochrome *c″* from the obligate methylotroph *Methylophilus methylotrophus*, an unexpected homolog of sphaeroides heme protein from the phototroph *Rhodobacter sphaeroides*
K. Klarskov, D. Leys, K. Backers, H.S. Costa, H. Santos, Y. Guisez and J.J. Van Beeumen (Belgium, Portugal) 47

Modulation of oxidative phosphorylation of human kidney 293 cells by transfection with the internal rotenone-insensitive NADH–quinone oxidoreductase (*NDI1*) gene of *Saccharomyces cerevisiae*
B.B. Seo, A. Matsuno-Yagi and T. Yagi (USA) 56

The plasma membrane NADH oxidase of HeLa cells has hydroquinone oxidase activity
T. Kishi, D.M. Morré and D.J. Morré (USA) 66

Information for Contributors *vii*

Regular papers

One of the non-exchangeable nucleotides of the mitochondrial F_1-ATPase is bound at a β-subunit: evidence for a non-rotatory two-site catalytic mechanism
A.F. Hartog and J.A. Berden (Netherlands) 79

Spectroscopic and molecular characterization of a long wavelength absorbing antenna of *Ostreobium* sp.
B. Koehne, G. Elli, R.C. Jennings, C. Wilhelm and H.-W. Trissl (Germany, Italy) 94

Oxygen uncouples light absorption by the chlorosome antenna and photosynthetic electron transfer in the green sulfur bacterium *Chlorobium tepidum*
N.-U. Frigaard and K. Matsuura (Japan) 108

Kinetic modeling of rotary CF_0F_1-ATP synthase: storage of elastic energy during energy transduction
O. Pänke and B. Rumberg (Germany) 118

Effects of the mitogen concanavalin A on pathways of thymocyte energy metabolism
S. Krauss, F. Buttgereit and M.D. Brand (Germany, UK) 129

The mobile loop region of the NAD(H) binding component (dI) of proton-translocating nicotinamide nucleotide transhydrogenase from *Rhodospirillum rubrum*: complete NMR assignment and effects of bound nucleotides
P.G. Quirk, K.J. Smith, C.M. Thomas and J.B. Jackson (UK) 139

Uphill energy transfer in LH2-containing purple bacteria at room temperature
H.-W. Trissl, C.J. Law and R.J. Cogdell (Germany, UK) 149

Xanthophyll pigments in light-harvesting complex II in monomolecular layers: localisation, energy transfer and orientation
W.I. Gruszecki, W. Grudzinski, A. Banaszek-Glos, M. Matula, P. Kernen, Z. Krupa and J. Sielewiesiuk (Poland, Switzerland) 173

Rapid report

Proton linkage of cytochrome *a* oxidoreduction in carbon monoxide-treated cytochrome *c* oxidase
M.I. Verkhovsky, N. Belevich, J.E. Morgan and M. Wikström (Finland) 184

Information for Contributors vii

Review

Does microbial life always feed on negative entropy? Thermodynamic analysis of microbial growth
U. von Stockar and J.-S. Liu (Switzerland) 191

Research papers

The hyperthermophilic bacterium, *Thermotoga maritima*, contains an unusually complex iron-hydrogenase: amino acid sequence analyses versus biochemical characterization
M.F.J.M. Verhagen, T. O'Rourke and M.W.W. Adams (USA) 212

Fluorescence polarization studies on four biliproteins and a bilin model for phycoerythrin 545
R. MacColl, L.E. Eisele and J. Marrone (USA) 230

Methanol modification of the electron paramagnetic resonance signals from the S_0 and S_2 states of the water-oxidizing complex of Photosystem II
Z. Deák, S. Peterson, P. Geijer, K.A. Åhrling and S. Styring (Sweden) 240

Molecular structure, localization and function of biliproteins in the chlorophyll *a/d* containing oxygenic photosynthetic prokaryote *Acaryochloris marina*
Q. Hu, J. Marquardt, I. Iwasaki, H. Miyashita, N. Kurano, E. Mörschel and S. Miyachi (Germany, Japan) 250

Voltammetric studies of bidirectional catalytic electron transport in *Escherichia coli* succinate dehydrogenase: comparison with the enzyme from beef heart mitochondria
H.R. Pershad, J. Hirst, B. Cochran, B.A.C. Ackrell and F.A. Armstrong (UK, USA) 262

Determination of Q_A-content in bacterial reaction centers: an indispensable requirement for quantifying B-branch charge separation
A. Ogrodnik, P. Müller, G. Hartwich and M.E. Michel-Beyerle (Germany) 273

Primary structure and characterisation of a 64 kDa NADH dehydrogenase from the inner membrane of *Neurospora crassa* mitochondria
A.M.P. Melo, M. Duarte and A. Videira (Portugal) 282

Identification of amino acids responsible for the oxygen sensitivity of ferredoxins from *Anabaena variabilis* using site-directed mutagenesis
B.B. Singh, I. Curdt, C. Jakobs, D. Schomburg, P.S. Bisen and H. Böhme (Germany, India) 288

Short sequence-paper

Characterization of the human *SDHD* gene encoding the small subunit of cytochrome *b* (cybS) in mitochondrial succinate–ubiquinone oxidoreductase
H. Hirawake, M. Taniwaki, A. Tamura, H. Amino, E. Tomitsuka and K. Kita (Japan) 295
